

AirAsia is flying high with Google Cloud

Modernises **systems**, processes and culture to focus on costs while **improving customer service**

Uses analysis, reporting and insights to **resolve problems** and **create opportunities**

Increases business agility by deploying faster and more frequently

With a minimal number of people involved, we can very quickly transform an idea or thought process into a deliverable. Prior to Google Cloud Platform, bringing those ideas to fruition would have been impossible”

Nikunj Shanti,
Chief Data and Digital Officer, AirAsia
