

# Kaeser Kompressoren migrates their SAP environment to Google Cloud

Talk to CIO [Falko Lameter](#) to discuss why they migrated their complete SAP landscape to GCP

Germany based manufacturer of compressors **providing solutions in more than 100 countries**

Migrating complete SAP landscape to Google Cloud for **improved availability and business flexibility**

Use Google Cloud Anthos to blend on prem and cloud based applications to **increase offerings and improve customer service**

All of this data from the machine data is combined with business data... if you're using Google service, it simply runs. There are no bugs. This was, I think, the platform for our future"
