Discuss with Head of Cross Domain [Soeren Linau](#) how to integrate GCP & Azure as well as all security related topics

Google Cloud Lands Agreement with Lufthansa Group to Support Optimization of its Airline Operations

Google Cloud technologies to power all-new Lufthansa Group operations platform

Sunnyvale, CA, and Munich, Germany [January 20, 2020] – [Google Cloud](#) today announced that Lufthansa Group, the world's largest aviation group in terms of revenue, has selected Google Cloud as a strategic partner to optimize its operations performance. Lufthansa Group will combine previously disparate systems and data feeds into one unified platform by leveraging Google Cloud's infrastructure and leading machine-learning capabilities.

"By combining Google Cloud's technology with Lufthansa Group's operational expertise, we are driving the digitization of our operation even further," said Dr. Detlef Kayser, Member of the Executive Board of the Lufthansa Group. "This will enable us to identify possible flight irregularities even earlier and implement countermeasures at an early stage."

Lufthansa Group's new operations platform will simultaneously consider a number of factors of a stable operation—aircraft rotation, aircraft maintenance, crew assignment and more—and provide recommendations to improve passenger punctuality, on-time flights and flight plan adherence in case of disruptions, such as weather events or
