

# Sabre forges a 10-year partnership with Google to build the future of travel

Sabre will begin the process of migrating its IT infrastructure to Google Cloud's highly available and secure services, **giving it greater flexibility to meet its technology objectives**

Google Cloud's data analytics tools will enable Sabre to **enhance the capabilities of current and future products**

They will provide Sabre with insights to help them **improve operational efficiency and create and optimise travel options**, improving both loyalty and revenues for its customers

As our preferred cloud provider and broader strategic partner, **Google Cloud will help to accelerate our digital transformation**

- Sean Menke, President & CEO, Sabre Corporation
